

AMEERA MANSUR OMAR

017-3801127 | ameeramansur04@gmail.com | Kuala Lumpur, Malaysia

Internship Availability: 12 October 2026 – 12 February 2027

Aspiring Cybersecurity professional pursuing a Bachelor of Cybersecurity Technology with Honours, with practical experience in mobile application security, vulnerability assessment, penetration testing, digital forensics, security auditing, and information security compliance. Experienced in conducting OWASP Mobile Top 10-based security testing, identifying access control and authentication weaknesses, performing ISO/IEC 27001-aligned physical security audits, and developing risk assessments and mitigation strategies. Proficient in cybersecurity tools, Linux environments, application security technologies, and software development.

Education

University Kuala Lumpur (UniKL MIIT)

2023 – 2027

Bachelor of Cybersecurity Technology with Honours, 3.59/4.00, 4x Semester Dean's List

Project Experience

Secure E-Counselling Appointment Mobile Application for UniKL MIIT Students

Oct 2025 – Jul 2026

Final Year Project

- Developed a secure Flutter/Firebase mobile counselling appointment system with Role-Based Access Control (RBAC) for students and counsellors, executing 23 functional test cases with a 100% pass rate and zero functional defects. Conducted OWASP Mobile Top 10-based VAPT covering broken access control, brute-force protection, TLS/MITM attacks, AES-256 secure storage, and audit log security, identifying Firestore access control and login attempt weaknesses and recommending remediation through stricter Firestore rules, Firebase App Check, and Cloud Functions.

Physical Security Audit-Kuala Lumpur International Airport Terminal 1

Dec 2025

ISMS Mini Project

- Conducted a simulated ISO/IEC 27001:2022 Annex A physical security audit covering server rooms, access checkpoints, CCTV surveillance, and emergency exits, identifying 9 security gaps across Low, Medium, and High-risk levels, including tailgating vulnerabilities and the absence of a formal third-party escort policy. Developed an audit report, risk assessment matrix, prioritised mitigation strategies, and ISO 27001-aligned physical security checklist to support risk reduction and compliance.

Capture The Flag (CTF) Competition

Nov 2025

Cyber Forensic Project

- Competed in a university-level cybersecurity challenge covering digital forensics, cryptanalysis, and vulnerability exploitation, solving beginner-to-advanced challenges using Kali Linux and decryption tools to analyse forensic evidence and cipher-based problems under time constraints.

Relevant Participations

Selected Top Participant, Final Year Project Innovation Showcase

2026

Selected Top Participant, FYP Abstract published in an ISBN-registered e-book

2026

Ranked 62nd from 100 Teams, Capture The Flag (CTF) Competition

2025

Volunteer, Stadium Bukit Jalil Clean-Up Initiative

2024

Certifications

Google Cybersecurity Professional Certificate, Coursera

2026

Network Operating System Badges, Red Hat Academy

2026

Google Project Management Certificate, Coursera

2025

Languages & Skills

Languages: Malay (Native) | English (Professional)

Technical Skills: Burp Suite | Wireshark | Postman | mitmproxy | Android Debug Bridge (ADB) | Snyk | Splunk | OWASP Mobile Top 10 | VAPT | Python | Dart | Java | JavaScript | SQL | HTML | CSS | Flutter | Firebase | Firebase Authentication | Firestore | Firebase App Check | Cloud Functions | Kali Linux | Fedora | Rocky Linux | Red Hat | Git | Linux Command Line | Microsoft Office 360 Suite | ISO/IEC 27001:2022

Core Skills: Cybersecurity | Vulnerability Assessment & Penetration Testing (VAPT) | Mobile Application Security | Digital Forensics | Security Auditing | Information Security Management | Risk Assessment | Security Testing | OWASP Mobile Top 10 | ISO/IEC 27001 Compliance | Access Control | Authentication & Authorization | Incident & Threat Analysis | Security Documentation | Technical Reporting | Network Analysis | Application Security | Cybersecurity Risk Mitigation | Security Monitoring
